Biography

STUDENT PROFILE:
T.I.P. 1st Year Student (2025-2026).
T.I.P. 2nd Year - 1st Sem Student
(2026-2027)

PARTNERSHIP AND MEMBERSHIP:
ICPEP - Media Committee Member
C&E Dept. - Media Committee
Member
IEEE - Semi Media Member

QUICK INFO:
Just a Photographer, Videographer,
and A Student that want's to capture
a Glimpse of Moment of Everyone.

FUN FACTS:
I never review subjects at home
unless forced to, but I do briefly
review before the test or the exam.

Course Overview

3.1.5 Lab - Explore CopyAI

Explore CopyAI

Click Pricing on the website.

List access options and the cost associated with each option.

Answer Area

\$24/mo per year of contract. And if in a large scale deployment, you would need to contact them first for a personalized plan.

Show Answer

List the features provided for each option.

Click **Show Answer** to see a couple of examples.

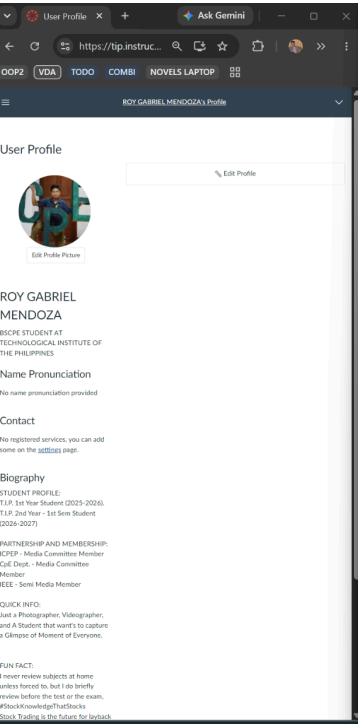

Free Plan	Pro	Enterprise
Answer Area 1 user only	Answer Area Includes 5 seats with unlimited chat words	Answer Area Includes 10 seats and 10,000 workflow credits per month for building
Answer Area 2000 words per month in chat	Answer Area unlimited chat projects	Answer Area Scales up capacity to 150-200 seats and up to 75,000 workflow credits

Free Plan	Pro	Enterprise
Answer Area 1 user only	Answer Area Includes 5 seats with unlimited chat words	Answer Area Includes 10 seats and 10,000 workflow credits per month for building
Answer Area 2000 words per month in chat	Answer Area unlimited chat projects	Answer Area 75,000 workflow credits for enterprise-level automation
Answer Area Access to basic models like ChatGPT 3.5 and Claude 3.	Answer Area access to top AI models (OpenAI, Anthropic, and Gemini).	Answer Area also includes Pro Level benefits.
Answer Area Type your answer here.	Answer Area Type your answer here.	Answer Area Priority Support
Answer Area Type your answer here.	Answer Area Type your answer here.	Answer Area Access to newest features

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

STEPS REFLECTIONS:

STEP 1:

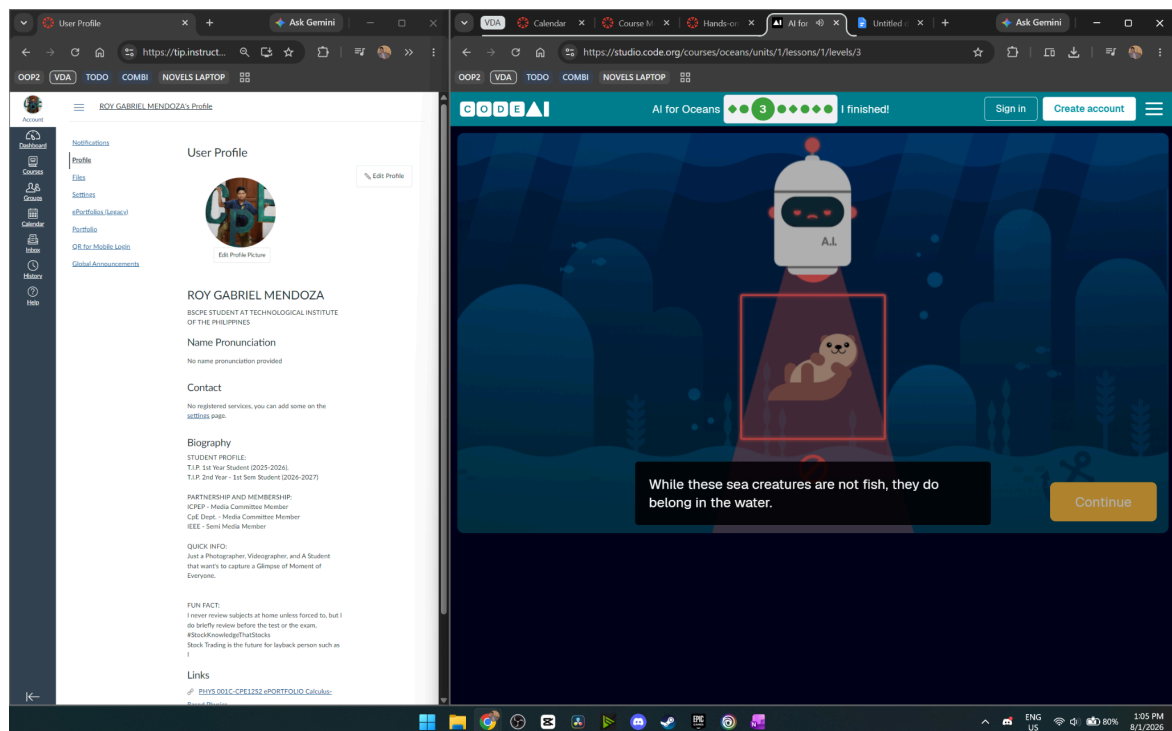

>> In this part, the video introduces the concept of machine learning as a new and transformative technology that influenced the daily life of almost everyone in all basic tasks, and to other specialized tasks like voice recognition and the likes. The speaker in the video has also expressed that the TRUE Artificial Intelligence is still decade away, and the current AI that we used in general is just a Machine Learning.

STEP 2:

>> In this part, I was tasked in training an AI, or an intelligent machine that can scan fish, fish shaped machine creatures, and separate them from trash in the ocean.

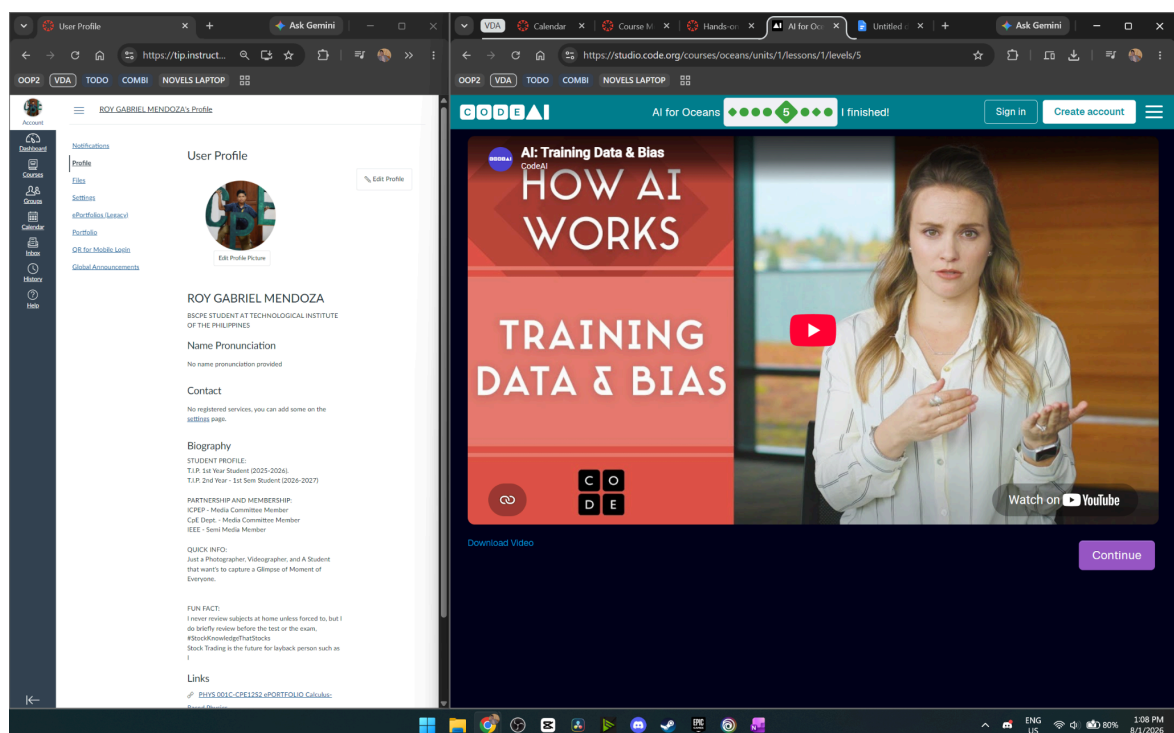

STEP 3-4:

>> In this part, we are tasked to train the AI in finding and separating different water based animals that might

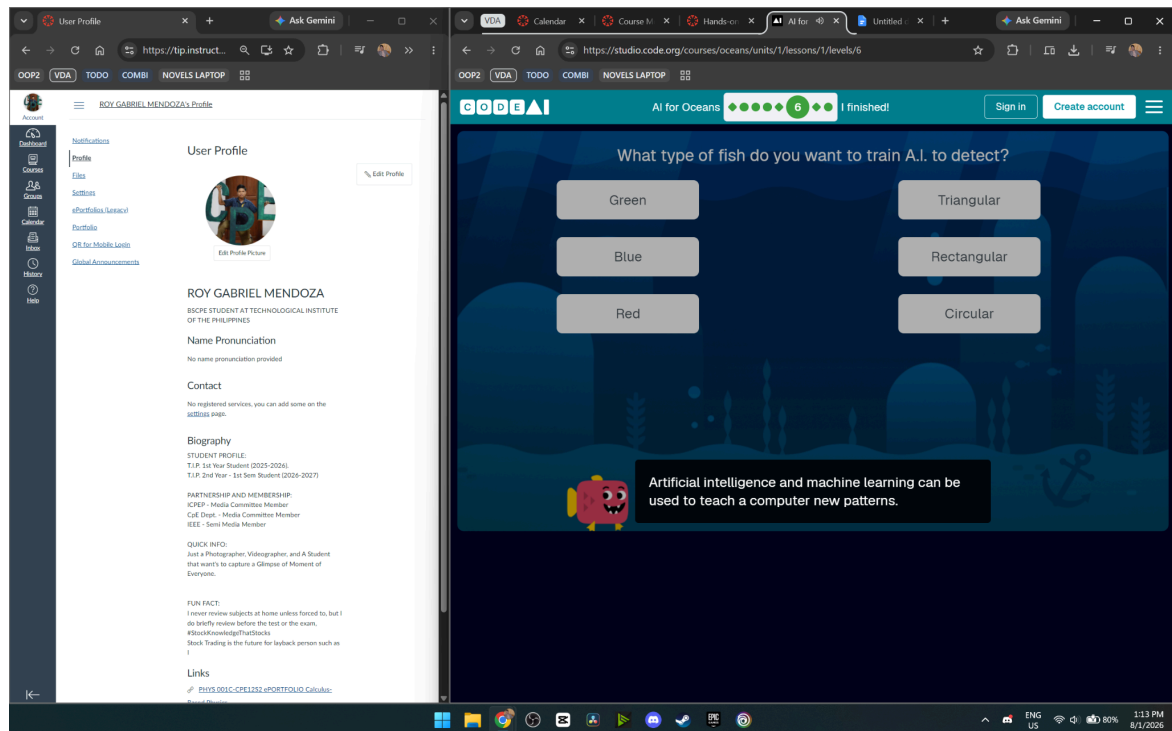

not look like fish and not make them be joined in the trash part of the separation.

STEP 5:

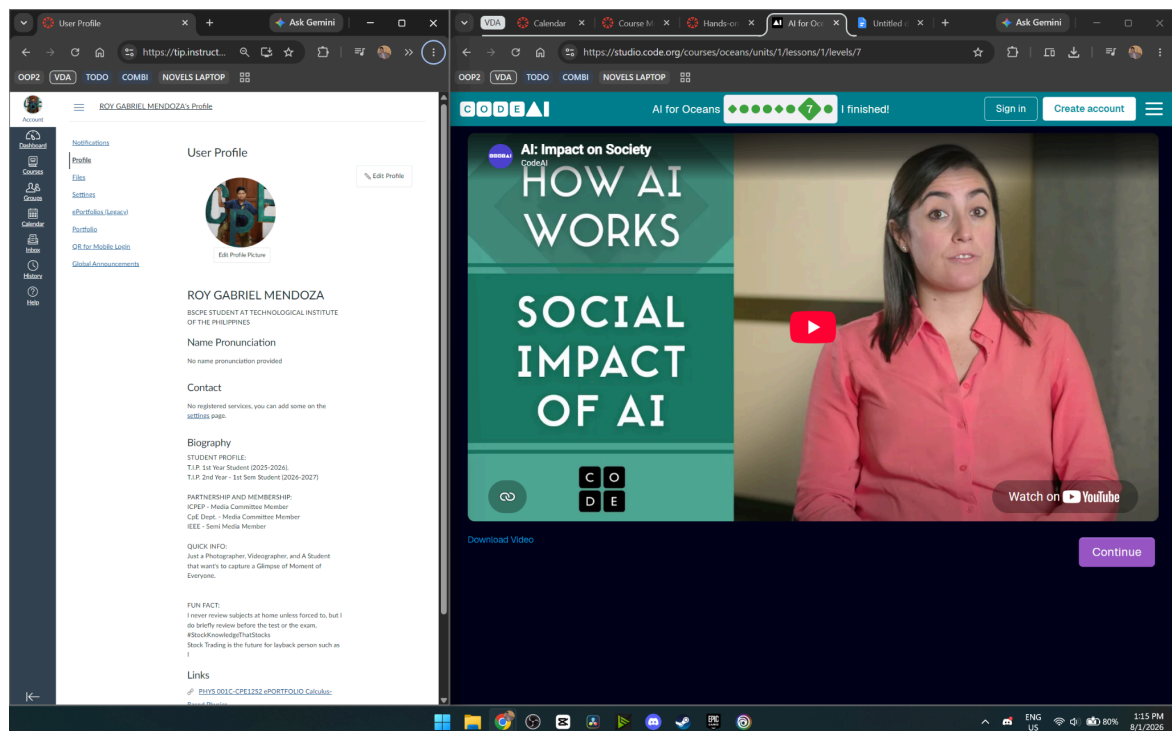

>> The second video primarily focuses on the critical role of data in machine learning, basically the way for a model to effectively train them using high quality datas and informations. This data is collected in various ways, such as streaming services data gathering methods, recognition of patters, even forums and forms, that requires and active participation of human to get more information. This part properly explains that the future of ethical AI depends less on the complexity of the algorithms, and more on the diversity and quality of the data we can get from all of human modern history.

STEP 6:

>> On this part of training the AI , we are tasked to select a specific parameter that the AI will be trained on, to further enhance and specify the target that the AI should be set upon.

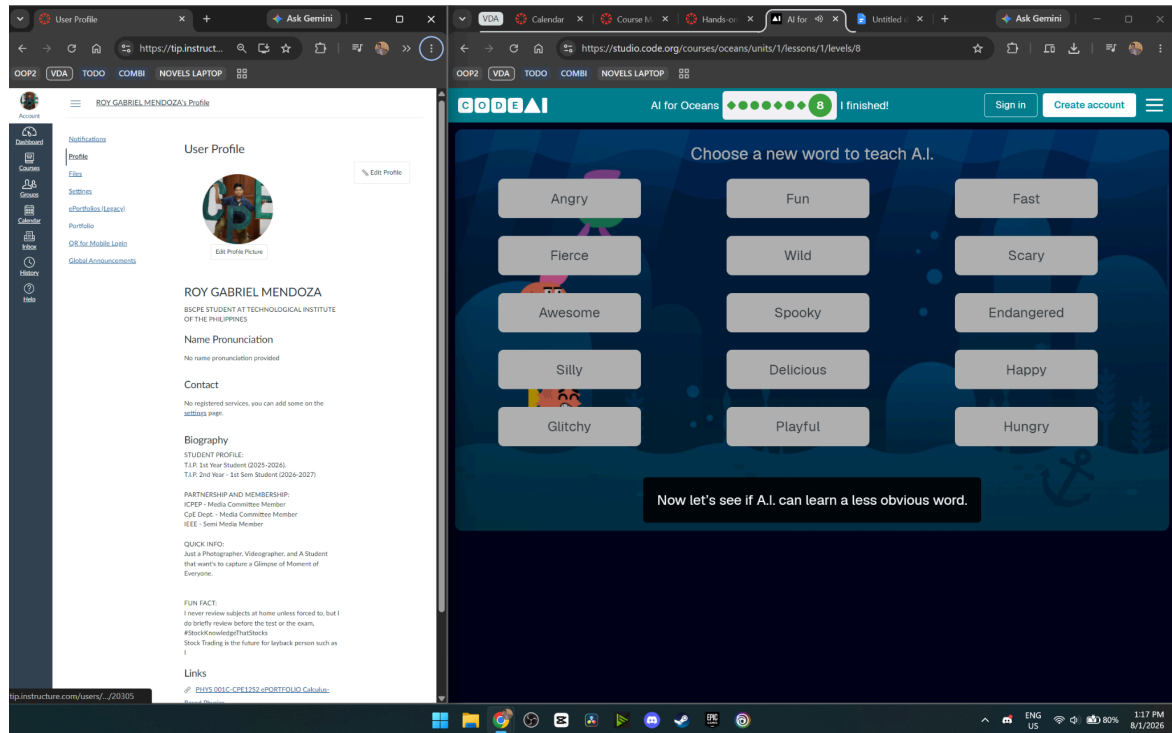

STEP 7:

>> In this 3rd video, the speaker has shown the impact of AI to the current society. AI might just be a tool, but

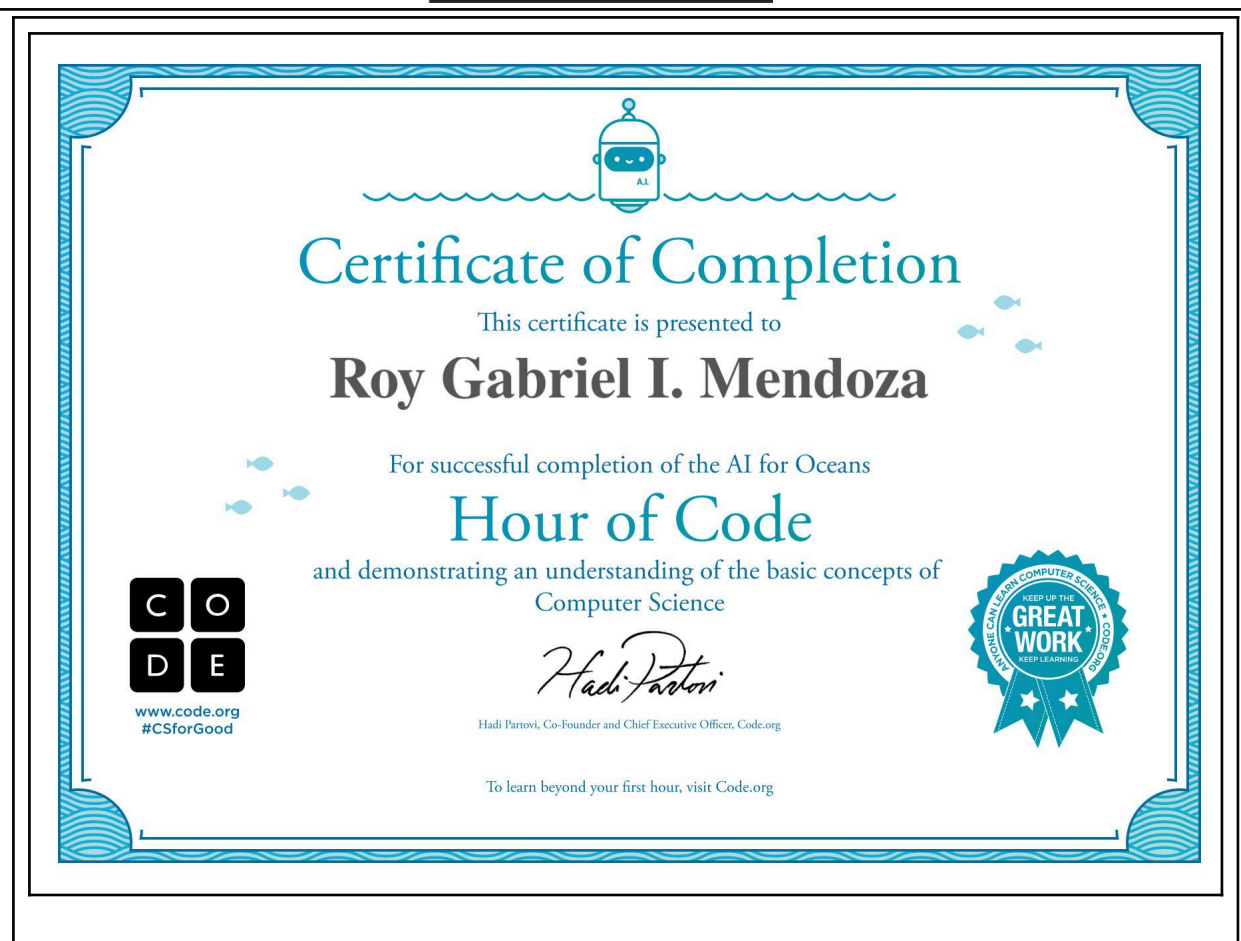

it is a technical Advancement of the human mind and creation that can be trained to show our own or worst intention depending on the quality of data we have feed these models on. Therefore, the future of the society, is dependent of the data and everything that we are currently do today, may them be good or bad.

STEP 8:

>> Now on the last part of the activity, we are tasked to select a specific word or parameter that will be used to train the AI, and this parameter is a more complex or less normal one so that the AI would be able to select and target that very very specific parameter that we have set it on.

CERTIFICATE OF COMPLETION:

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: NONE

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: NONE

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: NONE

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.
